SOFTWARE DEVELOPER

Full-Stack Software Developer with 2+ years of experience building, integrating, optimizing, and supporting production applications using C#/.NET, TypeScript, REST APIs, SQL, and Microsoft Azure.

SKILLS

Languages: C# | TypeScript | JavaScript | Python | SQL | HTML/CSS
.NET & Web: .NET 8/9 | ASP.NET Core | Web API | Entity Framework Core | LINQ | Razor Pages | Blazor | React
Cloud & DevOps: Azure App Service | Azure Functions | Azure Key Vault | Azure Storage | GitHub Actions | CI/CD | Docker
Databases: SQL Server | Cosmos DB | PostgreSQL | Azure Table Storage
Architecture & APIs: REST APIs | OpenID Connect | Dependency Injection | SOA | Modular Design | Separation of Concerns
Testing & AI: xUnit | Integration Testing | API Testing | Postman | Application Insights | OpenAI GPT APIs | Cursor

PROFESSIONAL EXPERIENCE

Pulse Alert, Hamilton, ON | Applications Developer | 08/2025 – 09/2026

- Optimized application performance, reducing Cosmos DB calls from 300+ to 3 per 100 users through query optimization.
- Modernized a monolithic ASP.NET Core application using modular design, dependency injection, separation of concerns, and separation of concerns.
- Built Azure Functions for serverless processing, application integration, and production background workflows.
- Integrated OpenAI GPT APIs into Azure Functions and AI calling workflows, validating outputs during model upgrades.
- Built and supported Azure Functions for serverless background and application-processing workflows.
- Improved code quality with xUnit, integration testing, code review, and GitHub Actions CI/CD automation.
- Deployed ASP.NET Core applications to Azure App Service using deployment slots, Azure Key Vault, and configuration management.
- Troubleshot production incidents using Application Insights, application logs, REST APIs, and database diagnostics.
- Created and maintained technical documentation, API documentation, release notes, and development standards.

Seradex Inc., Burlington, ON | Software Developer Co-op | 05/2024 – 09/2024

- Automated UI regression testing with TestComplete and resolved JavaScript and SQL application defects.

City of Hamilton, Hamilton, ON | Application Developer Co-op | 09/2023 – 12/2023

- Developed full-stack web features using C#, ASP.NET Core, Blazor, JavaScript, SQL Server, and REST APIs..
- Resolved application defects through debugging, database validation, code fixes, testing, and deployment support.

EDUCATION

Computer System Technology – Software Development (Co-op) | 02/2025
Mohawk College, Hamilton, ON
Dean's Honour List

PROJECTS

Healthcare Care-Coordination Platform

React 19 | TypeScript | .NET 9 | ASP.NET Core Web API | Cosmos DB | SQL Server | Docker | Azure

- Designed and developed a .NET 9 ASP.NET Core Web API integrating React, REST APIs, Cosmos DB, and SQL Server.
- Translated business requirements into API contracts, technical designs, workflows, and implementation plans.
- Developed and integrated a .NET 9 service-oriented API with React/TypeScript features, using REST APIs, validation, Cosmos DB, and SQL Server.
- Directed React/TypeScript frontend development and aligned client-side workflows with backend API requirements.
- Validated production releases using xUnit, integration testing, API testing, frontend testing, and user acceptance testing.
- Created and maintained testing, user, API, and technical documentation as well as release notes.
